

Dear Customer!

Clinical Trial Support makes a special offer for frequently required measuring equipment – **Calibrated Refrigerator/Freezer min/max thermometers** Fisher Scientific FB50268 with NIST certification.

Each measuring instrument is provided with Traceable® Certificate of Calibration. Calibration complies with ISO/IEC 17025, ANSI/NCSL Z540-1 and 9001 standards.

Min/Max thermometers are required for monitoring storage temperature of temperature sensitive materials and are commonly supplied to study sites to monitor drug products storage temperature. Commonly supplied thermometers are often not suitable for this task. Calibration is the proof that the measuring instrument has shown correct values which helps evaluate product quality.

Calibrated Fisher Scientific FB50268 Min/Max Thermometer

Model: FB50268
Temperature range: -40 — +50°C
Accuracy: ± 0.5°C with a resolution of 0.1°
Min/max memory
Probe is sealed in glycol solution
Supplied with NIST calibration certificate
Dimensions (mm) 69x108x19
Net weight: 113 grams
Maximum calibration period – 2 years.

Offer price (per 1 unit):
8050 RUB – Retail price
1300 RUB – Monthly rental fee, including free continuous replacement of units with expired calibration

Equipment is fully maintained and calibrated.
Minimum rental term: 6 months.
Delivery costs are quoted separately.
Offer is valid until December 2013.

Limited quantity, hurry while the stock lasts!
